RE: OBF Issue 3450, LSOG: Standard Validation and Submission fields for REQ TYP "C" Simple and Non-Simple Port Orders

Dear Ms. Campagnoli, Ms. Peterman and Mr. Steen:

The Alliance for Telecommunications Industry Solutions' (ATIS') Ordering and Billing Forum Local Service Ordering (OBF LSO) Subcommittee has developed a proposed solution in response to the Local Number Portability Administration Working Group's (LNPA WG) request to address standard validation and submission fields for REQ TYP "C" Simple and Non-Simple Port orders. Details regarding the solution are attached hereto.

Significant industry work has gone into the development of this solution. In addition to examining this issue from a technical perspective, OBF LSO also reviewed the Commission's May 13, 2009, *Report and Order* (FCC 09-41) to ensure adherence to regulations and to understand the scope of the work.

Please let me know if you have any questions or need additional information.

Best regards,

Thomas Goode
ATIS General Counsel
